**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 14-18, drawn to a computer-based method and system of providing comparative cost information for health insurance plan, classified in class 705, subclass 4.
- II. Claims 7-13 and 19-25, drawn to a computer-based method and system for calculating optimal flexible saving account contribution, classified in class 705, subclass 30.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a computer-based method and system of providing comparative cost information for health insurance plan. Invention II has separate utility such as a computer-based method and system for calculating optimal flexible saving account contribution. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each group is not required for other group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
